

Torqo & SureTorque Trade-In Program

Mesa Laboratories, Inc. is offering significant trade in values toward the purchase of a new Torqo or SureTorque analyzer for:

Torqo and SureTorque Units Competitive Motorized Torque Analyzers Competitive Manual Analyzers

Torqo II+

SureTorque

ST-Inline

Why Trade-In?

Design innovation has been taken into account to improve the mechanics of measuring torque to provide customers with improved ergonomics and repeatability. Also, many models have contain critical components that are now obsolete and unsupported. While Mesa Labs provides best-in-class calibration & evaluation services for all Torqo and SureTorque units, repair services for the old or unsupported models are expensive or not available.

The procedure is easy; simply provide the model number (i.e. 1502-30) as well as the serial number from the backside of the analyzer in order for the trade-in value to be applied on the quotation for a new unit. Mesa will ship the new analyzer to the customer's location and the customer then simply returns the older unit to Mesa's designated return location.

Mesa will also provide the first annual calibration and NIST traceable certification with every trade in. The Torqo II+ and SureTorque analyzers include a full one-year warranty covering all parts and labor.

For further information or to request a quote on the Torque Trade-In Program, please contact torque@mesalabs.com or dial (303) 987-8000 to speak with a representative. We look forward to continuing to serve the cap testing industry and our loyal customer base.
