

End of Sale Notice

ST-120 End of Sale Notice

Date: October 1, 2014

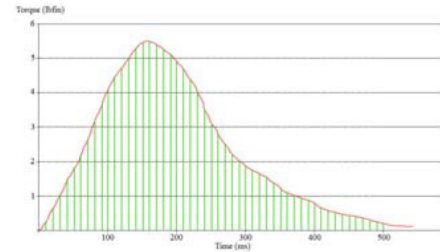

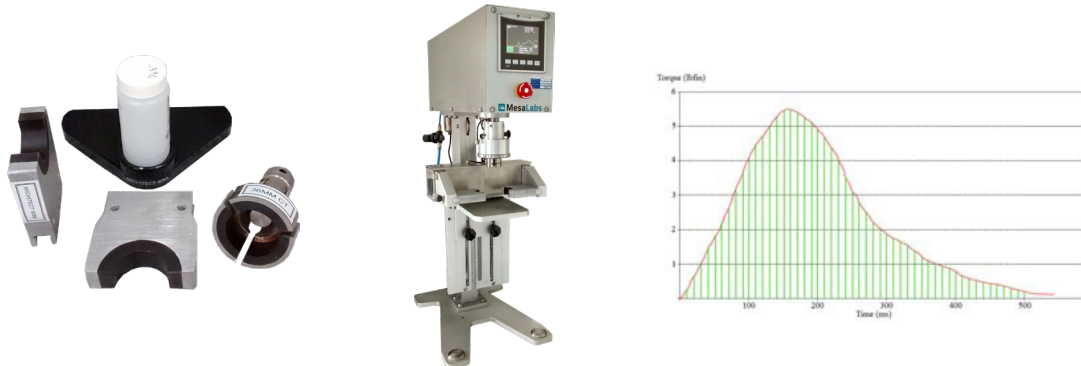

To: Mesa Labs Torque Customers & Distributors

From: Mesa Laboratories, Inc.

Subject: Automatic Torque Tester Model ST-120 End of Sale

Effective July 1, 2015 Mesa Labs will be discontinuing the production of the Automatic Torque Tester Model ST-120. Mesa Labs will continue to accept RMAs for service and calibration for an additional **five years** until December 31, 2021.

As a replacement for the **ST-120**, we recommend the **ST-120S** and the **ST-120S NEMA**. Both models offer similar capabilities regarding capacity, topload control and monitoring, PLC and servo control. However, the ST-120S / NEMA models offer an increased capacity for container sizes as well as the NEMA rated enclosure option is recommended for washdown/corrosive environments. An **Upgrade** option is available for the ST-120. The upgrade includes a new head mount with the new PLC and servo drive.

All SureTorque testers are configurable to test various size and shape containers. Tooling is designed for quick, tool-free changeover. Design specific tooling provides secure 360 degree gripping of cap and container. Adjustable chuck and clamp pressures, ensure appropriate cap and bottle grip. Anti-bridging, Anti tie-down, Anti-repeat dual actuation safety start control for improved operator safety. Full safety enclosure is optionally available.

Visit our website to learn more about the ST-120S / NEMA at www.torque.mesalabs.com.

For further information on the discontinuation of the ST-120 as well as and service options, please contact torque@mesalabs.com or dial (303) 987-8000 to speak with a representative. We look forward to continuing to serve the cap testing industry and our loyal customer base.

Sincerely,

The Mesa Laboratories Team
